Cedric Vicera

Email: vicera@seas.upenn.edu
Website: www.cedricvicera.com
LinkedIn: www.linkedin.com/in/cedricvicera

Education

University of Pennsylvania Expected May 2023
Master of Computer and Information Technology

University of Arizona May 2020
Bachelor of Arts in Philosophy (with Honors)

Skills

Languages Python, R, SQL

Technologies pandas, NumPy, Scikit-learn, TensorFlow, Matplotlib, Seaborn, ggplot2, PySpark, Databricks, Git

Data Science A/B Testing, Hypothesis Testing, Logistic Regression, Random Forest, Neural Networks

Experience

CVS Health Jun 2022 – Aug 2022
Data Science Intern · Retail Pharmacy Consumer Analytics

- Leveraged a Random Forest Multi-Treatment Uplift model to optimize timing of SMS messages for immunizations outreach.
- Performed data cleaning, aggregation and feature engineering on 52M patient immunization and retail data.

St. Jude Children's Research Hospital May 2021 – Jul 2021
Biostatistics Research Intern

- Wrangled pediatric oncology patient health records to visualize several average temporal trends in patient BMI based on presence versus absence of bacteria species pair.
- Implemented a linear mixed-effects model to identify 3 bacteria species pairs correlated with elevated post-treatment BMI.
- Conducted hypothesis testing and presented results in a research seminar and wrote a manuscript detailing project methods and discussion.

University of Arizona College of Engineering Aug 2018 – May 2020
Research Assistant · Computational Medicine and Informatics Collaboratory

- Wrote scripts to extract critical care telemedicine data to analyze failure rates and temporal differences between noninvasive ventilation strategies of 10K+ patients.
- Conducted subgroup analysis to identify patient personas and generated Sankey diagrams to visualize 9 patient subgroup outcomes.
- Applied logistic regression to show that NIPPV patients have an increase of 16.8% in mortality compared to HFNI patients, who carry a 6.6% increase in mortality.

Projects

COVID-19 Risk Factor Predictor *Python (Flask, pandas), HTML/CSS* cedricvicera/CovidRFP

- Developed a full-stack web application to display an analysis of identified COVID-19 risk factors for a user.
- Implemented front-end and back-end services.
- Conducted data analysis by leveraging CDC COVID-19 Public Data to compute user results.
