

# Cedric Vicera

**Email:** vicera@seas.upenn.edu  
**Website:** www.cedricvicera.com

## EDUCATION

---

### University of Pennsylvania

*Master of Computer and Information Technology*

Expected May 2023

### University of Arizona

*Bachelor of Arts in Philosophy (with Honors)*

May 2020

## SKILLS

---

**Languages** Python, R, Java, SQL, MATLAB

**Technologies** pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, Seaborn, dplyr, ggplot2, Git

**Data Science** A/B Testing, Hypothesis Testing, Deep Learning

## EXPERIENCE

---

### CVS Health

*Data Science Intern · Analytics and Behavior Change Team*

Jun 2022 – Aug 2022

### St. Jude Children's Research Hospital

*Biostatistics Research Intern*

May 2021 – Jul 2021

- Wrangled pediatric oncology patient health records to visualize several average temporal trends in patient BMI based on presence versus absence of bacteria species pair.
- Implemented a linear mixed-effects model to identify 3 bacteria species pairs correlated with elevated post-treatment BMI.
- Conducted hypothesis testing and presented results in a research seminar and wrote a manuscript detailing project methods and discussion.

### University of Arizona College of Engineering

*Research Assistant · Computational Medicine and Informatics Collaboratory*

Aug 2018 – May 2020

- Wrote scripts to extract critical care telemedicine data to analyze failure rates and temporal differences between noninvasive ventilation strategies of 10K+ patients.
- Conducted subgroup analysis to identify patient personas and generated Sankey diagrams to visualize 9 patient subgroup outcomes.
- Applied logistic regression to show that NIPPV patients have an increase of 16.8% in mortality compared to HFNI patients, who carry a 6.6% increase in mortality.

## PROJECTS

---

### COVID-19 Risk Factor Predictor *Python (Flask, pandas), HTML/CSS*

cedricvicera/CovidRFP

- Developed a full-stack web application to display an analysis of identified COVID-19 risk factors for a user.
- Implemented front-end and back-end services.
- Conducted data analysis by leveraging CDC COVID-19 Public Data to compute user results.

## PUBLICATIONS

---

P. Essay, C. Vicera, J. Mosier, V. Subbian. Analysis of Acute Respiratory Failure Patient Noninvasive Ventilation Therapy. *American Thoracic Society International Conference*. 2020.

C. Vicera. Persona Identification in Tele-ICU Data of Mechanically Ventilated Patients. *UROC Abstract Review*. 2019.
