EDUCATION

University of Pennsylvania

Expected May 2023

Master of Computer and Information Technology

University of Arizona

May 2020

Bachelor of Arts in Philosophy (with Honors)

SKILLS

Languages Python, R, Java, SQL, MATLAB

Technologies pandas, NumPy, Scikit-learn, TensorFlow, Keras, PyTorch, Matplotlib, Seaborn, dplyr, ggplot2, PySpark, Git

EXPERIENCE

CVS Health

Jun 2022 – Aug 2022

Data Science Intern · Retail Pharmacy Consumer Analytics

- Model implementation for timing optimization of SMS outreach for immunization growth.

St. Jude Children's Research Hospital

May 2021 – Jul 2021

Biostatistics Research Intern

- Wrangled pediatric oncology patient health records to visualize several average temporal trends in patient BMI based on presence versus absence of bacteria species pair.
- Implemented a linear mixed-effects model to identify 3 bacteria species pairs correlated with elevated post-treatment BMI.
- Conducted hypothesis testing and presented results in a research seminar and wrote a manuscript detailing project methods and discussion.

University of Arizona College of Engineering

Aug 2018 – May 2020

Research Assistant · Computational Medicine and Informatics Collaboratory

- Wrote scripts to extract critical care telemedicine data to analyze failure rates and temporal differences between noninvasive ventilation strategies of 10K+ patients.
- Conducted subgroup analysis to identify patient personas and generated Sankey diagrams to visualize 9 patient subgroup outcomes.
- Applied logistic regression to show that NIPPV patients have an increase of 16.8% in mortality compared to HFNI patients, who carry a 6.6% increase in mortality.

PUBLICATIONS

P. Essay, C. Vicera, J. Mosier, V. Subbian. Analysis of Acute Respiratory Failure Patient Noninvasive Ventilation Therapy. *American Thoracic Society International Conference*. 2020.

C. Vicera. Persona Identification in Tele-ICU Data of Mechanically Ventilated Patients. *UROC Abstract Review*. 2019.

PROJECTS

COVID-19 Risk Factor Predictor *Python (Flask, pandas), HTML/CSS*

cedricvicera/CovidRFP

- Developed a full-stack web application to display an analysis of identified COVID-19 risk factors for a user.
- Implemented front-end and back-end services.
- Conducted data analysis by leveraging CDC COVID-19 Public Data to compute user results.
